

ACHIEVE RAPID CLEANCORE CODE READINESS

BTP Readiness Assessment Framework for App Dev, Integration & Data Management

WRICEF	Traditional Customization Use Cases	Enhanced Use Cases	Solution Approach
Workflow	Approvals/Decision-Making	Flexible pre-delivered workflows & RPA's with LCNC	SAP BTP Workflow
Report	Operational reporting, adapt CDS views, Fiori dashboards	In-depth analytics with SAP and non-SAP data, historical reporting, planning with SAP/non-SAP, etc.	BTP - SAP Analytics Cloud (SAC)/Planning, SAP Datasphere or Data Suite, Key User Extension, and SAC
Interface	X	Pre-delivered non-SAP, 3 rd party, SAP integrations, event triggers	BTP - API Hub, Integration Suite, Advanced Event Mesh
Conversion	X		Data Migration and/or Simplification Conversion with BTP ABAP & Eclipse Plugin
Enhancements	User exits, BADIs, Append Structures	CDS View Enhancements, API Extensions	BTP - Application Dev & Automation Suite (BAS, LCNC), SAP BTP ABAP, Key User Extension
Forms	Output Management (ADS)		BTP - Forms, SAP Process Automation (LCNC), WorkZone

Regardless of your current ERP landscape, SAP's Business Technology Platform (BTP) helps you gain key cloud advantages at the Use Case level across Lines of Business. Using BTP, you'll enhance, accelerate, automate, and simplify core business processes in the cloud while minimizing cost, time, and risk.

To become BTP ready, you'll need to assess and tweak code assets so that they comport with BTP's CleanCore requirement.

The InFocus Code Readiness Assessment, a Sierra exclusive, is a remotely-administered system scan that prescribes for you what to do, in what order, when, and how in order to stage your CleanCore transformation.

The Assessment consists of a 5-day, deep dive into your existing code environment and future state ambitions. Running from ABAP Cloud on

BTP, the Assessment delivers:

- Overview of As-Is and To-Be Architecture
- WRICEF System Scan: Inventory of Migration Objects
- How each customization will manifest in BTP
- C3 Assessment Report
- Natural language, AI-powered insights from SAP's Virtual GenAI Assistant
