Client Profile

This company was founded in 1945 as a small drugstore on Sto. Cristo Street in Binondo, Manila. Over time, they grew to be a leading healthcare organization

Business Challenge

- This client, a leading healthcare organization, faces operational challenges due to a siloed landscape. There is a critical need for consolidation and a clean core assessment. They were using ECC6 on EHP6 version, which was two decades old, along with additional add-on systems such as SAP BW and IS modules, running on Oracle DB.
- Unilab aims to innovate by migrating from older SAP versions to SAP S/4HANA Cloud using a Clean Core approach. This transition requires addressing legacy system issues and integrating disparate processes to establish a unified digital foundation

Sierra Solution

Sierra was selected for our strong SAP presence, particularly our exclusive partnership with SAP to develop the datasphere assessment tool. We delivered:

- Sierra provided assistance in understanding as to how to get the data sourced for the Dashboard so that it can be accessed from both a laptop through a web browser as well as from an iPad and for the CEO Dashboard.
- Delivered dashboard to the user community through BI portal.

Results

- Improve decision making capacity by implementing BOBJ Dashboards which will monitor and understand the performance of each business unit

- Pre canned dashboards allows management to quickly gather information across multiple departments

- Gain real-time access to current and critical business intelligence.

- Identify trends in various departments and business units before they become an issue

- Integrated systems allows for better collaboration within the management team

- The right data at the right time leads to improved business execution

- Improve business execution while reducing total cost of ownership (TCO)
